ISSUES OBSERVED ON THE ANDROID MOBILE APPLICATION, ONLINE PORTAL, AND BACKEND

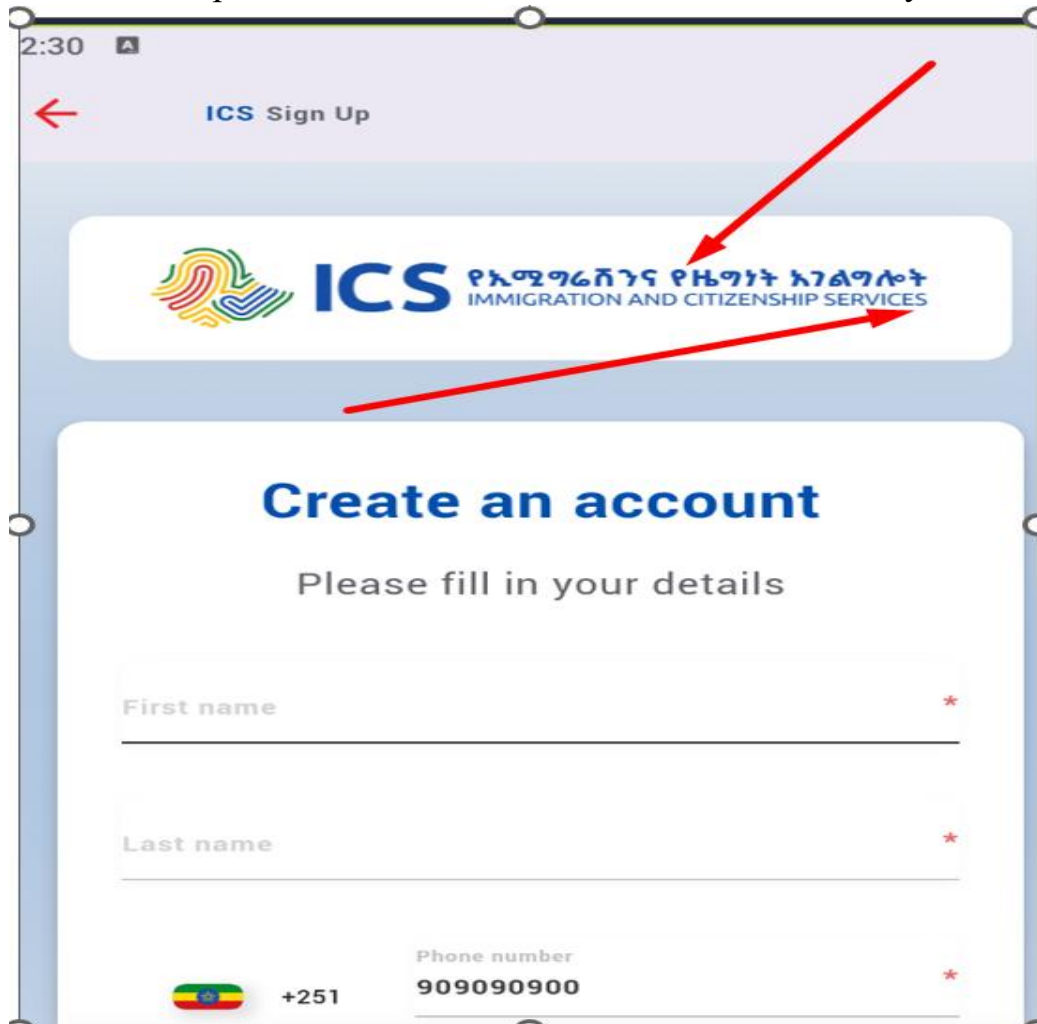

Digital Transformation Directorate
October 2025

ISSUES OBSERVED ON THE ANDROID MOBILE APP, ONLINE PORTAL, AND BACKEND

1. The logo to be used shall be as follows.

2. The layout shall remain consistent across all smart devices, as discrepancies have been observed in the current design.
3. Labels should be presented in bold fonts to ensure clear visibility.

2:30

Last name *

Phone number *

+251 909090900

4. Numeric characters should be restricted in the first name and last name fields.

The screenshot shows a mobile application interface for 'ICS Sign Up'. At the top, there is a status bar with the time '2:32' and a signal icon. Below it is a navigation bar with a red back arrow and the text 'ICS Sign Up'. The main content area features the ICS logo (a colorful fingerprint icon) and the text 'ICS የኢሚግሬሽንና የዜግነት አገልግሎት' and 'IMMIGRATION AND CITIZENSHIP SERVICES'. The title 'Create an account' is displayed in large blue font, followed by the instruction 'Please fill in your details'. There are three input fields: 'First name' with the value '90900990909', 'Last name' with the value '90900090090', and 'Phone number' with the value '909090900'. Each field has a red asterisk on the right. Two red arrows point from the top right towards the 'First name' and 'Last name' fields, highlighting the numeric input. The phone number field includes a dropdown menu showing the flag of Ethiopia and the code '+251'.

5. Copy-and-paste operations should be restricted in the password field to enhance security during applicant login.

6. The application should be compatible across all Android versions and not dependent on a specific version. It has been observed that the App currently runs only on Android 15.

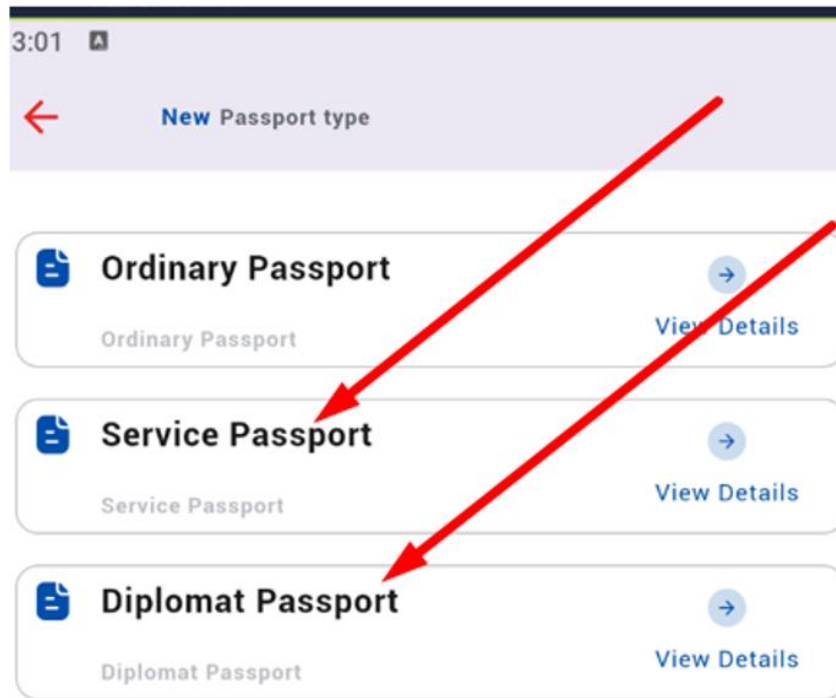

7. It is recommended that language options be displayed as text rather than flags for better clarity and inclusiveness.

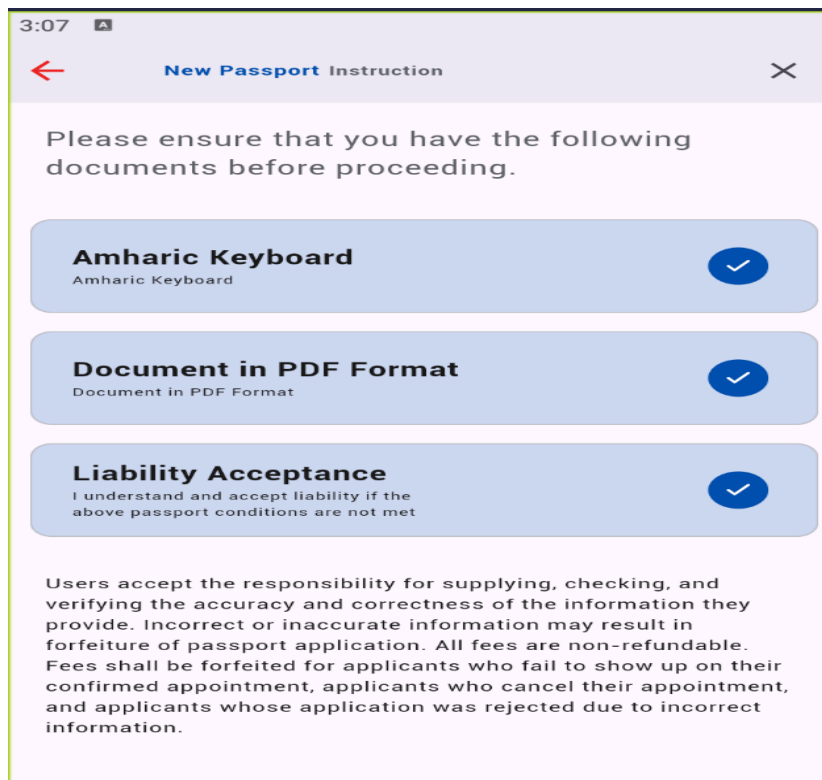

8. The application does not currently allow users to switch between languages.
9. Service listings must be defined based on the account category, such as Visa or Origin ID.

10. The application should ensure that the passport service is available only for ordinary passports.

11. The application contains redundant instructions that need to be eliminated.

12. Functions related to collection, urgency level, and passport page options are currently mismatched and should be removed. Collection locations should be clearly listed, while delivery locations will be managed by ICS.

The screenshot shows a mobile application interface for a 'Passport urgency' form. At the top, there is a header bar with a back arrow, the title 'Passport urgency', and a close 'X' button. The form contains three main sections: 'Collection address' with a building icon, 'Select Urgency Level' with a clock icon, and 'Select Passport Page Size' with a document icon. Each section has a dropdown menu. The 'Collection address' dropdown is currently set to 'Ethiopia'. The 'Select Urgency Level' dropdown is currently empty. The 'Select Passport Page Size' dropdown is currently set to '32 pages'. A yellow warning box at the bottom of the form contains a warning icon and the text: 'Please select urgency level and page size to see pricing information.' Below the warning box is a large grey button labeled 'Next'. Four red arrows are overlaid on the image: one points to the 'Ethiopia' selection, another points to the 'Select Urgency Level' dropdown, a third points to the '32 pages' selection, and a fourth points to the warning message box.

1.10 Review and update the comments displayed on the PDF output.

2. Renew Origin ID/Renew Passport

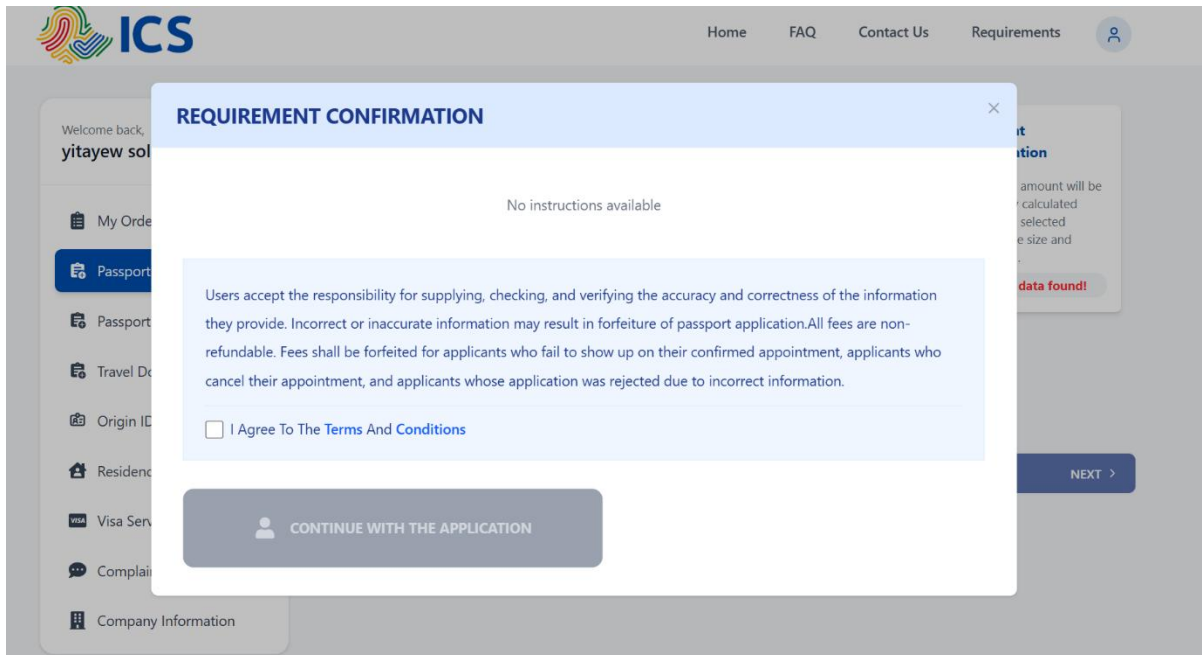

In general: The application currently requires the Previous Origin ID or Passport Number.

Issues Observed on the applicant Portal

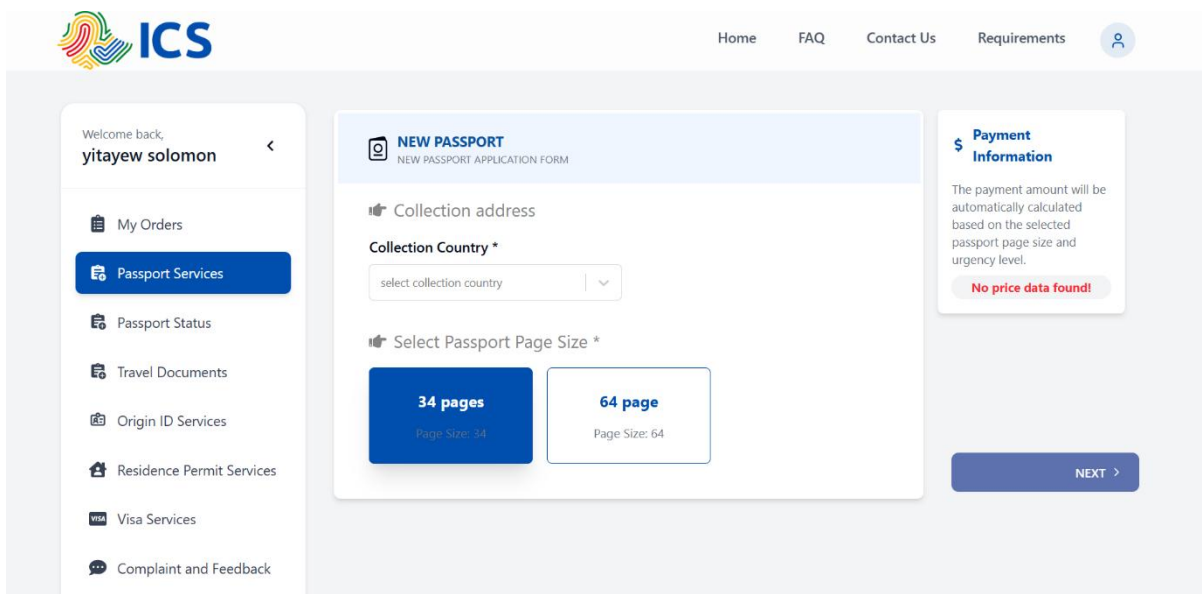

1. The system currently does not allow registration of a new applicant account.
To create a new applicant account, Unable to register as a new applicant
2. Log in as Applicants
 - a. The portal should display only the service types selected by the applicant.

- b. When applying for a new passport, the Terms and Conditions should be updated to reflect that delivery will be handled by ICS.

- c. Applicants are limited to the 34-page passport, as the 64-page option is not provided.

- d. The Urgency Level should be clearly defined and explained to applicants.

4. For the New Origin ID (Under Age) process, the Urgency Level and Delivery Information should be revised as previously commented. Additionally, the Appointment and Delivery Dates require review and adjustment.
 - a. After selecting the 'Under Age' option, the system still allows applicants to proceed with an adult application.

Personal Information

Below are the personal information you've provided

Birth Date: **Tue Feb 18 1975** Birth Country: **United States**

Nationality: **American** Marital Status: **SINGLE**

Height (cm):

Skin Color: Eye Color: Hair Color:

b. The Email field must be mandatory for all applicants.

The screenshot shows the ICS application interface. At the top, there's a navigation bar with 'Home', 'FAQ', 'Contact Us', and 'Requirements'. The main content area is divided into three sections. The left section contains a vertical sidebar with icons for various functions. The middle section features a large black box for a signature, with a 'clear' button and a 'save' button (indicated by a green checkmark). Below the signature box is a 'Video' upload area. The right section contains three form panels: 'Full Name (English)' with the value 'Yitayew Yitayew Yitayew', 'Personal Information' with fields for Birth Date (Tue Feb 18 1975), Birth Country (Ethiopia), Nationality (Ethiopian), and Marital Status (SINGLE), and 'Address Information' with fields for Address (Addis Abeba), Country (Ethiopia), Phone Number (+251990099090), and Email.

c. The system should verify the necessity of requesting signatures and video attachments from underage applicants (see attachment 4b).

d. The system only requests a birth certificate as an attachment. It should also specify whether guardian documents (e.g., Passport or Origin ID) are required, as referenced in attachment 4c.

5. New Origin ID by Spouse

a. The system currently allows applicants under the legal age to apply, even though they should not be eligible. This restriction needs to be enforced.

The screenshot shows a portion of the ICS application form. On the left, there are input fields for a first name (with an asterisk), a last name, and a country dropdown menu. Below these is a 'Next' button. The main content area is a 'Personal Information' panel with a blue pencil icon for editing. It contains the following fields: Birth Date (Wed Oct 01 2025), Birth Country (United States), Nationality (American), Marital Status (SINGLE), Height (cm), Skin Color, Eye Color, and Hair Color.

- b. The Visa Type and Visa Number fields must be mandatory to ensure complete and accurate application data.

The image shows two screenshots from a web application. The top screenshot is titled 'Uploaded Documents' and shows a 'Birth Certificate' document with a 'View Document History' link. The bottom screenshot is a multi-step form titled 'Step 5: Visa Information'. It includes a sidebar with navigation links, a progress indicator, and several input fields for passport details and personal information.

APPLICATION REVIEW LOGS

RAISED ISSUES

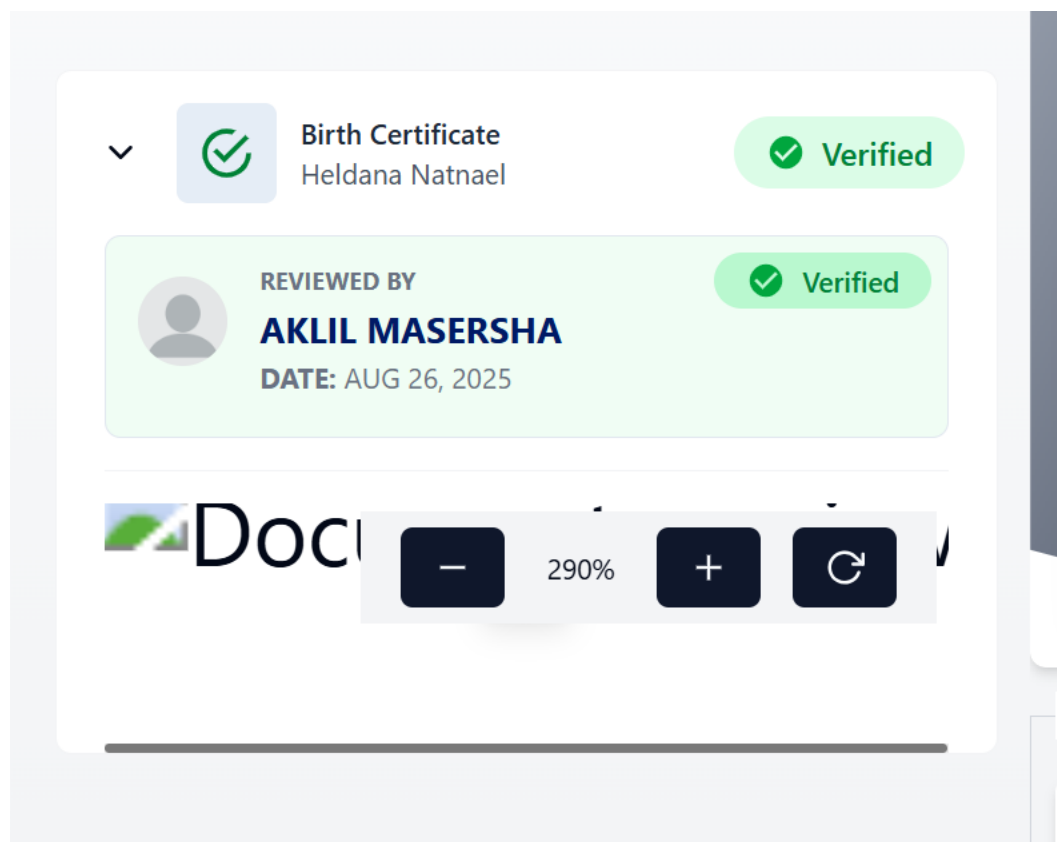

RAISE ISSUE

7. Backend Validation

- 7 – Language translations are currently not functional and require correction to ensure proper multilingual support. Language Translations are not functional.

- 7 – B There is an issue with zoom functionality in the attachment preview, which needs to be addressed for proper document inspection.

The system has not yet been tested with the biometric device, and verification with the hardware is required to ensure full functionality.

Authorization

Applications that have not been properly validated are currently appearing in the Authorization section and being authorized. This issue needs to be corrected to enforce proper validation workflows.
